Item description review

73 proposed revisions to preserve the default card image size

Current descriptions are reproduced from the local equipment catalogs. The new descriptions are proposals for review; no item records have been changed.

Fit check: each proposal uses no more than five lines in the current card renderer (36 px Handwritten, 480 px text width, 40 px line spacing). Six lines fit without shrinking the prior default image; every proposal therefore has at least one line of margin. Custom Foundry items are outside this review.

Item	Current description	Proposed shorter description
01. Body Shield Armor	This tall, kite-shaped body shield is built from stout wooden planks banded with dark iron and anchored by a heavy central boss, broad enough to cover a warrior from shoulder to knee. Designed for shield-wall fighting and holding ground, it trades agility for tremendous frontal protection.	A tall kite-shaped shield of stout wood, iron bands, and a heavy central boss covers the body from shoulder to knee. Built for shield-wall fighting, it trades agility for strong frontal protection.
02. Brigandine Armor	Brigandine is a flexible armor made of small overlapping steel plates riveted between layers of sturdy fabric or leather, creating a protective yet maneuverable defense. Its distinctive grid of visible rivets gives it a rugged, utilitarian appearance favored by soldiers and mercenaries.	Flexible armor of small overlapping steel plates riveted between sturdy fabric or leather layers. Its visible rivet grid gives soldiers and mercenaries practical protection with good maneuverability.
03. Great helm Armor	This great helm is a heavy cylindrical helmet of thick steel, with narrow eye slits and rows of punched ventilation holes forming a stark, imposing mask. Typically worn by knights and heavy infantry, it provides exceptional protection to the entire head—though at the cost of limited vision and airflow.	A heavy cylindrical steel helmet with narrow eye slits and punched ventilation holes protects the entire head. It offers exceptional defense at the cost of limited vision and airflow.
04. Helmet Armor	This standard helmet is a sturdy steel cap with a reinforced brow and a simple nasal guard, offering balanced protection without restricting vision. Common among soldiers and adventurers, it provides reliable head defense while remaining light enough for extended wear.	A sturdy steel cap with reinforced brow and simple nasal guard protects the head without restricting vision. It is light enough for extended wear by soldiers and adventurers.

Item	Current description	Proposed shorter description
05. Ring mail Armor	Ring mail consists of a leather or cloth garment reinforced with metal rings sewn directly onto its surface, providing basic protection without the full weight of true chain mail. It is typically worn by low-status soldiers or adventurers needing inexpensive armor that offers better defense than padded or leather options, though it remains less effective than more advanced mail types.	A leather or cloth garment reinforced with sewn metal rings, ring mail offers better defense than padded or leather armor without true chain mail's weight. It is less effective than advanced mail.
06. Bracers Clothing	These leather bracers are shaped to protect the forearms, with reinforced stitching and a simple lace-up closure that allows for a snug, secure fit. Adventurers wear them for light protection against scrapes, bowstring snap, and glancing blows without the weight of metal armor.	Leather forearm guards with reinforced stitching and a lace-up closure protect against scrapes, bowstring snap, and glancing blows without the weight of metal armor.
07. Robes Clothing	Wizard's robes are long, flowing garments tailored for ease of movement and often inscribed subtly or boldly with symbols of arcane study. Though they offer little physical protection, they feature numerous hidden pockets for storing spell components and serve as a mark of training, tradition, and mystical authority.	Long, flowing wizard's robes allow easy movement and may bear symbols of arcane study. They offer little physical protection but include hidden pockets for spell components.
08. Clothes, Commoner's Clothing	This set of commoner’s clothes consists of simple, durable garments made from coarse linen and wool, designed for everyday labor and travel. Such clothing is typically worn by peasants and townsfolk, offering basic comfort and protection while remaining inexpensive and easy to replace.	Simple, durable linen and wool garments for everyday labor and travel. Commoner's clothes provide basic comfort and protection while remaining inexpensive and easy to replace.
09. Clothes, Merchant's Clothing	This set of merchant’s clothes consists of well-made but practical garments designed to present a respectable appearance while enduring long days of travel and trade. Such clothing is typically worn by traders and shopkeepers, balancing comfort, durability, and subtle displays of prosperity when conducting business.	Well-made, practical garments for travel and trade, balancing comfort and durability with a respectable display of prosperity. Merchant's clothes suit traders and shopkeepers.

Item	Current description	Proposed shorter description
10. Clothes, Adventurer's Clothing	This set of adventurer’s clothes consists of sturdy, well-fitted garments reinforced with leather and designed for comfort during long days of travel. Such clothing is typically worn by explorers and mercenaries, providing durability, freedom of movement, and basic protection in the field.	Sturdy, well-fitted garments reinforced with leather for long travel. Adventurer's clothes provide durability, freedom of movement, and basic protection in the field.
11. Clothes, Nobleman's Clothing	This set of noble’s clothes is composed of finely tailored garments made from quality fabrics, accented with decorative trim and refined details. Such attire is typically worn at court, formal gatherings, or official functions to display status, wealth, and social standing.	Finely tailored garments of quality fabric with decorative trim and refined details. Nobleman's clothes are worn at court and formal functions to display status and wealth.
12. Backpack Gear	This rugged leather backpack is fitted with multiple buckled pockets and a rolled blanket strapped across the top, showing the scuffs and creases of long travel. It is typically used by adventurers to carry rations, tools, and gear on the road, keeping their hands free for weapons, torches, or climbing.	A rugged leather backpack with buckled pockets and a rolled blanket strapped across the top. It carries rations, tools, and gear while leaving the wearer's hands free.
13. Bedroll Gear	This bedroll is a tightly rolled bundle of thick, worn canvas or wool, secured with a pair of cracked leather straps and brass buckles. It is typically used by travelers and adventurers as a simple portable sleeping mat, providing a little warmth and comfort when camping under the open sky or on dungeon stone.	A tightly rolled bundle of worn canvas or wool secured by cracked leather straps and brass buckles. It serves as a portable sleeping mat, adding warmth and comfort while camping.
14. Belt Pouch (L) Gear	This large belt pouch is a rounded, roomy leather bag with a broad flap and brass-buckled strap, built to hang securely from a waistbelt. It is typically used by adventurers to carry bulkier essentials like rations, tools, or extra coin—when a small pouch simply won’t suffice. 1 pouch can be attached to a single belt.	A roomy leather pouch with broad flap and brass-buckled strap, made to hang securely from a waistbelt. It holds bulkier essentials such as rations, tools, or extra coin; 1 pouch attaches to one belt.
15. Holy Symbol Gear	A religious emblem, amulet, or pendant (metal, wood, or stone)Usually worn on a chain or leather thong. Even ornate silver or gem-inlaid versions rarely exceed ½ lb. A large ceremonial one (altar piece) could weigh several pounds, but the adventuring version is light and portable.	A religious emblem, amulet, or pendant of metal, wood, or stone, worn on a chain or leather thong. Adventuring versions rarely exceed ½ lb; a large ceremonial altar piece may weigh several pounds.

Item	Current description	Proposed shorter description
16. Lantern, Bullseye Gear	A bullseye lantern is a metal-cased lamp with a shuttered housing and a single, thick glass lens that focuses its light into a narrow, far-reaching beam. Adventurers typically use it when they need to see a long distance down corridors or roads while keeping surrounding areas in comparative shadow. It burns one flask of oil per 4 hours (24 turns) and casts light in a 60' cone.	A metal-cased lantern with shuttered housing and a thick glass lens focuses light into a narrow beam. It burns 1 flask of oil per 4 hours (24 turns) and casts light in a 60' cone.
17. Lantern, Hooded Gear	A hooded lantern is a metal-framed light source with a directional hood that shields the flame and focuses its beam forward. It is commonly used by travelers and adventurers who need controlled, wind-resistant illumination in dark or hazardous environments. Burns one flask of oil per 4 hours (24 turns). Casts light in a 30' radius.	A metal-framed lantern with a directional hood shields the flame and focuses light forward. It burns 1 flask of oil per 4 hours (24 turns) and casts light in a 30' radius.
18. Piton Gear	This metal piton is a tapered spike with a forged eyelet for threading rope, its surface worn and scuffed from repeated climbing use. Adventurers hammer it into cracks or seams in stone to create secure anchor points for climbing, rappelling, and traversing dangerous terrain.	A tapered metal spike with a forged eyelet for threading rope. Hammered into cracks or seams in stone, it creates anchor points for climbing, rappelling, and dangerous traverses.
19. Pole, Ten Foot Gear	A 10-foot wooden pole used for prodding suspicious areas or measuring distances in a dungeon. Carried with difficulty indoors or underground; too long to strap to a pack, usually dragged or carried in hand. May be split into two 5-ft. sections for easier transport.	A 10-foot wooden pole for probing hazards and measuring dungeon distances. Too long to strap to a pack, it must be held or dragged; it may split into two 5-ft. sections for transport.
20. Sack, Large Gear	This large sack is a coarse burlap bag tied shut with a thick rope, its fabric worn from heavy use and bulging with whatever has been stuffed inside. Adventurers typically use it to haul bulky loot, provisions, or miscellaneous gear that won't fit neatly into a pack. Capacity: 24 slots (600 coins).	A coarse burlap sack tied with thick rope for bulky loot, provisions, or gear. Capacity: 24 slots (600 coins).

Item	Current description	Proposed shorter description
21. Baldric Gear	A broad leather strap worn diagonally across the chest and shoulder, designed to carry a large two-handed sword across the back with the hilt accessible over the shoulder. Frees the hands while keeping the weapon secure and ready during travel. The only practical way to carry a Zweihander or Greatsword.	A broad leather strap carries a two-handed sword across the back, hilt over the shoulder, leaving hands free. The only practical way to carry a Zweihander or Greatsword.
22. Scroll Case Gear	A protective tube designed to store and transport parchment scrolls, maps, or important documents. Crafted from sturdy materials like wood, leather, and metal, it shields its contents from weather and wear while allowing adventurers or scholars to carry their writings safely on the road.	A sturdy wood, leather, or metal tube that protects parchment scrolls, maps, and documents from weather and wear while they are carried on the road.
23. Vial or Bottle Gear	This small glass vial is a sturdy, cork-sealed container used to hold potions, holy water, alchemical mixtures, or other valuable liquids. Adventurers and scholars alike rely on such vials to store and transport substances safely while keeping them readily accessible in the field.	A small, sturdy glass container sealed with a cork for potions, holy water, alchemical mixtures, or other valuable liquids. It keeps contents safe and accessible in the field.
24. Sidesack Gear	A sidesack is a lightweight pack worn diagonally across the front of the body. Slimmer and less cumbersome than a traditional backpack, it leaves the wearer free to move while keeping essential gear close at hand. Its many pouches, pockets, and loops provide secure storage for tools, supplies, and other adventuring necessities.	A lightweight pack worn diagonally across the front, slimmer than a backpack and easy to move in. Pouches, pockets, and loops keep tools, supplies, and other essentials close at hand.
25. Dog, Guard Livestock	This guard dog is a muscular, broad-chested hound with a cropped tail, thick neck, and heavy leather collar, its stance braced and expression wary. It is typically used by nobles, merchants, and watchmen to protect homes, caravans, and strongholds, barking warnings and attacking intruders on command.	A muscular guard hound with cropped tail and leather collar. Nobles, merchants, and watchmen use it to guard homes, caravans, and strongholds, barking warnings and attacking intruders on command.

Item	Current description	Proposed shorter description
26. Donkey Livestock	This donkey is a small, sturdy beast with long ears, a rough coat, and a patient expression, rendered in muted browns and greys. It is typically used by farmers and travelers to carry packs or pull small carts, prized for its endurance and surefootedness more than for speed.	A small, sturdy beast with long ears and a rough coat. Farmers and travelers use it to carry packs or pull small carts, valuing its endurance and surefootedness over speed.
27. Hawk, Trained Livestock	This hawk is a sharp-eyed raptor with mottled brown plumage, curved talons, and a hooked beak, rendered in earthy tones with careful feather detail. It is typically used by hunters, scouts, and rangers as a trained companion for scouting, tracking, or delivering swift, deadly strikes from above.	A sharp-eyed hawk with mottled brown plumage, curved talons, and a hooked beak. Hunters, scouts, and rangers train it for scouting, tracking, and swift, deadly strikes from above.
28. Horse, Draft Livestock	This draft horse is a stocky, muscular animal with feathered hooves and a sturdy harness, built for strength rather than speed. It is typically used to pull wagons, plows, and heavy loads, serving as the backbone of caravans and farmsteads alike in a medieval-fantasy world.	A stocky, muscular horse with feathered hooves and a sturdy harness, built for strength over speed. It pulls wagons, plows, and heavy loads for caravans and farmsteads.
29. Horse, Riding Livestock	This riding horse is a lean, well-muscled bay with a worn leather saddle and bridle, built for speed and endurance rather than brute strength. It is typically used by messengers, travelers, and light cavalry to cover long distances quickly across roads, fields, and open country.	A lean, well-muscled bay with a worn leather saddle and bridle, built for speed and endurance. Messengers, travelers, and light cavalry ride it across roads, fields, and open country.
30. Horse, War Livestock	This war horse is a powerful, broad-chested steed with sturdy legs and a worn leather war saddle, built to carry an armored rider into the thick of battle. Trained not to panic at blood, noise, or steel, it is typically used by knights and heavy cavalry to charge enemy lines and break formations.	A powerful, broad-chested steed with sturdy legs and a worn leather war saddle, trained not to panic at blood, noise, or steel. Knights and heavy cavalry use it to charge and break enemy formations.
31. Mule Livestock	This mule is a sturdy, surefooted beast of burden with simple tack and bulging saddlebags, built more for endurance than for speed or glamour. It is typically used by merchants and adventurers to haul gear, supplies, and treasure across rough terrain where wagons and fine horses would struggle.	A sturdy, surefooted beast of burden with simple tack and saddlebags, built for endurance over speed. Merchants and adventurers use it to haul gear, supplies, and treasure across rough terrain.

Item	Current description	Proposed shorter description
32. Sheep Livestock	This sheep is a woolly, thick-fleeced animal with a calm expression and sturdy legs, rendered in soft, earthy tones. It is typically raised by villagers and herders for its wool, milk, and meat, grazing in flocks across hillsides and pastures around rural settlements.	A woolly, thick-fleeced animal with sturdy legs, raised by villagers and herders for wool, milk, and meat. It grazes in flocks across hillsides and pastures around rural settlements.
33. Chest, Large Misc	This large ('24" × 16" × 16"') wooden chest, reinforced with iron bands and secured by a heavy lock, is built to store valuables, equipment, or important supplies. Adventurers and merchants alike rely on such chests to keep their belongings safe from theft, weather, and the dangers of travel.	A large wooden chest (24" × 16" × 16") reinforced with iron bands and secured by a heavy lock. It stores valuables, equipment, and supplies safely from theft, weather, and travel dangers.
34. Tent, 1-person Misc	This one-person tent is a compact canvas shelter supported by simple poles and stakes, designed to protect a lone traveler from wind and weather. It is typically used for overnight camps, providing basic cover and privacy while remaining light enough to carry on long journeys.	A compact canvas shelter for one person, supported by simple poles and stakes. It protects a lone traveler from wind and weather while remaining light enough for long journeys.
35. Tent, 2-person Misc	This two-person tent is a sturdy canvas shelter supported by simple poles and stakes, offering enough space for two travelers to rest and store basic gear. It is typically used for shared camps, providing protection from the elements while remaining practical for overland travel.	A sturdy canvas shelter for two people, supported by simple poles and stakes, with room for basic gear. It protects travelers from the elements during overland journeys.
36. Tent, 4-person Misc	This four-person tent is a large canvas shelter supported by multiple poles and stakes, offering ample space for several travelers and their gear. It is typically used by small groups to establish a shared campsite, providing protection from the elements during extended journeys or expeditions.	A large canvas shelter for four people, supported by multiple poles and stakes, with room for their gear. Small groups use it for shared camps during extended journeys and expeditions.
37. Barding, Chain mail Tack	Chain mail barding is a flexible suit of interlocking metal rings designed to protect a horse from cuts and punctures while maintaining mobility. It is typically used for light and medium cavalry, offering a balance of protection and movement without the restrictive weight of full plate barding.	A flexible suit of interlocking metal rings protecting a horse from cuts and punctures while preserving mobility. Light and medium cavalry use it as a balance of protection and movement.

Item	Current description	Proposed shorter description
38. Barding, Leather Tack	This leather barding set consists of layered, hardened-leather plates shaped for a horse's head, neck, chest, and flanks, reinforced with rivets and fitted with thick straps and buckles for secure mounting. It is typically used by light and medium cavalry to give their mounts flexible, reliable protection while avoiding the heavy weight and cost of metal barding.	Hardened-leather plates cover a horse's head, neck, chest, and flanks, with rivets, straps, and buckles. Light and medium cavalry use it for flexible protection without metal's weight and cost.
39. Barding, Plate Tack	Plate barding is a full set of articulated metal armor designed to protect a warhorse in battle, covering the head, neck, chest, and flanks with shaped steel plates. It is typically used by heavily armed cavalry, allowing a mounted warrior to charge into combat with both rider and horse protected from blades, arrows, and other battlefield dangers.	A full suit of articulated steel plates covers a warhorse's head, neck, chest, and flanks. Heavily armed cavalry use it to protect horse and rider from blades, arrows, and other battlefield dangers.
40. Barding, Scale Tack	Scale barding is a full set of articulated metal armor designed to protect a warhorse in battle, covering the head, neck, chest, and flanks with shaped steel plates. It is typically used by heavily armed cavalry, allowing a mounted warrior to charge into combat with both rider and horse protected from blades, arrows, and other battlefield dangers.	Articulated metal armor covers a warhorse's head, neck, chest, and flanks. Heavy cavalry use it to protect horse and rider from blades, arrows, and other battlefield dangers.
41. Bit & Bridle Tack	This bit and bridle set is made of worn brown leather straps fitted with a simple steel bit and rings, shaped to sit comfortably on a horse's head. It is typically used to guide and control a mount, transmitting the rider's cues through the reins and bit for steering, stopping, and managing pace.	Worn brown leather straps with a simple steel bit and rings fit a horse's head. The reins and bit transmit a rider's cues for steering, stopping, and managing pace.
42. Saddlebags, Large Tack	These large over-the-saddle bags are a hefty pair of deep leather pouches joined by a wide strap, built to drape securely across a horse's back. They are typically used by caravans, couriers, and long-range adventuring parties to carry bulk supplies, trade goods, or treasure while keeping the load balanced and off the rider's body.	Deep leather pouches joined by a wide strap drape across a horse's back. Caravans, couriers, and adventurers carry bulk supplies, trade goods, or treasure in them, balanced off the rider.

Item	Current description	Proposed shorter description
43. Copper Coins Treasure	The Penny is the smallest denomination of currency, used for common transactions such as food, lodging, or simple goods. Though individually modest in worth, Pennies are essential to daily trade and circulate widely among all classes. 10 Pennies match the worth of 1 Sovereign, and one 100 Pennies weigh approximately 2 pounds.	The Penny is the smallest denomination, used for food, lodging, and simple goods. 10 Pennies equal 1 Sovereign, and 100 Pennies weigh approximately 2 pounds.
44. Gold Coins Treasure	The Crown is a rare and prestigious gold coin, valued far above all other denominations. Often hoarded by nobles, merchants, and adventurers alike, it represents true wealth and purchasing power within the realm. 1 Crown matches the worth of 10 Sovereigns and 100 Crowns weigh approximately 4 pounds.	The Crown is a rare, prestigious gold coin valued above all other denominations. 1 Crown equals 10 Sovereigns, and 100 Crowns weigh approximately 4 pounds.
45. Diamond Treasure	A brilliant, colorless diamond cut into a precise round form, its many facets catching even the faintest light and scattering it in cold, prismatic fire. Entirely natural and unenchanted, it is prized for its exceptional clarity, enduring hardness, and the costly skill required to reveal such radiance.	A natural, unenchanted, colorless diamond cut round, prized for exceptional clarity, hardness, and the costly skill needed to reveal its prismatic brilliance.
46. Ruby Necklace Treasure	A finely wrought gold necklace set with a procession of deep crimson rubies, each carefully cut to kindle with ember-red light as it moves. Though entirely unenchanted, the richness of its gems and the delicacy of its workmanship mark it as a jewel fit for a noble court.	A finely wrought gold necklace set with deep crimson rubies, each cut to catch ember-red light. Entirely unenchanted, its rich gems and delicate workmanship suit a noble court.
47. Cart Vehicles	This sturdy two-wheeled wooden cart has iron-banded wheels, a slatted cargo bed, and long shafts ready to be hitched to a beast of burden. It is typically used by farmers, merchants, and traveling parties to haul goods, supplies, and sometimes passengers along rough roads and village lanes.	A sturdy two-wheeled wooden cart with iron-banded wheels, a slatted cargo bed, and shafts for a beast of burden. Farmers, merchants, and travelers haul goods, supplies, and passengers in it.

Item	Current description	Proposed shorter description
48. Bastard Sword Weapons	This bastard sword features a long, double-edged blade with a simple yet elegant crossguard and an extended leather-wrapped grip suited for either one- or two-handed use. It is typically favored by versatile knights and adventurers who want the option to strike with the speed of a longsword or the heavier blows of a greatsword as the situation demands.	A long, double-edged blade with a simple crossguard and extended leather-wrapped grip, usable one- or two-handed. It offers longsword speed or greatsword-weighted blows as needed.
49. Battle Axe, 2-Handed Weapons	A two-headed, two-handed battle axe is a brutal heavy weapon featuring twin crescent blades mounted on a long reinforced haft, designed to deliver devastating cleaving strikes. It is typically used by powerful warriors capable of wielding its weight to split shields, armor, and even large creatures with overwhelming force.	A heavy two-handed battle axe with twin crescent blades on a reinforced haft, made for powerful cleaving blows against shields, armor, and large creatures.
50. Broadsword Weapons	This broadsword has a wide, double-edged steel blade with a simple crossguard and a leather-wrapped grip ending in a solid pommel for balance. It is typically used by heavily armed warriors as a primary melee weapon, delivering powerful chopping and slashing blows in close combat.	A wide, double-edged steel sword with a simple guard, leather grip, and balanced pommel, built for powerful chopping and slashing in close combat.
51. Crossbow, Heavy Weapons	This heavy crossbow features a thick wooden tiller reinforced with iron bands and a powerful steel bow, its cord drawn taut for immense penetrating force. It is typically used by soldiers and siege troops to deliver slow but devastating bolts that can punch through armor or pin targets at long range.	A heavy crossbow with an iron-reinforced wooden tiller and steel bow. It fires slow, powerful bolts for long-range attacks that can pierce armor or pin targets.
52. Dagger Weapons	This compact dagger features a tapered, double-edged steel blade designed for quick thrusts and precise striking. Its leather-wrapped grip and simple guard give it a practical, utilitarian character favored by scouts, thieves, and seasoned adventurers alike.	A compact, double-edged steel dagger with a leather grip and simple guard, suited to quick thrusts and precise strikes.

Item	Current description	Proposed shorter description
53. Dart Weapons	This dart is a small throwing missile with a slim wooden shaft, a leaf-shaped steel head, and feather fletching at the tail for stability in flight. It is typically used by rogues, hunters, and lightly armed warriors to deliver quick, accurate ranged attacks or poisoned strikes at short distances.	A small throwing missile with a wooden shaft, leaf-shaped steel head, and feather fletching, used for accurate short-range attacks or poisoned strikes.
54. Great Club Weapons	This great club is a massive, two-handed cudgel carved from a single length of hardwood, its head thick and knotted with age while the lower grip is wrapped in worn leather. It is typically used by barbarians, ogres, and other brute warriors to deliver bone-crushing blows that rely more on raw strength than finesse.	A massive two-handed hardwood cudgel with a thick, knotted head and worn leather grip, delivering bone-crushing blows through raw strength.
55. Greatsword Weapons	This greatsword is a long heavy two-handed blade with a straight double-edged steel edge, a broad crossguard, and an extended leather-wrapped grip. A standard military great sword carried by elite soldiers and powerful adventurers who rely on reach and devastating cleaving strikes.	A long, heavy two-handed sword with a straight double-edged blade, broad guard, and extended leather grip, made for reach and devastating cleaving strikes.
56. Hand Axe Weapons	This compact hand axe has a single crescent-shaped steel blade set into a sturdy wooden haft, its grip wrapped in leather for better control. Balanced for both chopping and throwing, it’s a favorite sidearm of woodsmen, skirmishers, and lightly armored adventurers.	A compact axe with a crescent steel blade and leather-wrapped wooden haft, balanced for both chopping and throwing.
57. Javelin Weapons	This slim throwing spear has a straight ash-wood shaft tipped with a narrow, leaf-shaped steel head bound in place with dark wire. Light and well-balanced, it’s made to fly true over distance, ideal for skirmishers and warriors who soften their foes before closing to melee.	A light throwing spear with an ash shaft and narrow leaf-shaped steel head, balanced to fly true over distance before melee begins.
58. Khopesh Weapons	This khopesh is a single-edged bronze or steel blade that curves forward into a sickle-like hook, mounted on a simple hilt with a wrapped grip. It is typically used to deliver powerful chopping blows and to hook shields or limbs, making it a brutal and versatile weapon favored by warriors of ancient, desert-born cultures.	A single-edged bronze or steel blade curving into a sickle-like hook, made for powerful chopping blows and hooking shields or limbs.

Item	Current description	Proposed shorter description
59. Light Hammer Weapons	This light hammer is a compact one-handed striking weapon with a small iron head and a short wooden haft wrapped in leather. Balanced for both melee combat and throwing, it is favored by dwarves, smiths, and warriors who want a reliable blunt weapon that doubles as a ranged tool.	A compact one-handed hammer with an iron head and leather-wrapped wooden haft, balanced for melee combat or throwing.
60. Longbow Weapons	This longbow is a tall, recurved wooden bow with a leather-wrapped grip and a taut dark string, built for power and accuracy at great distances. It is typically used by hunters and archers who rely on strong draw weight and long-range volleys to strike foes before they can close to melee.	A tall, recurved wooden bow with leather grip and taut string, built for strong draws, accurate shots, and long-range volleys.
61. Longsword Weapons	This finely forged longsword features a straight, double-edged blade with a broad fuller running down its center, balanced for both cutting and thrusting. A simple steel crossguard, leather-wrapped grip, and brass-capped pommel give it a practical yet noble look, befitting the standard weapon of knights and seasoned adventurers.	A straight, double-edged blade with a broad fuller, steel guard, leather grip, and brass-capped pommel, balanced for cutting and thrusting.
62. Mace Weapons	This mace features a flanged steel head mounted on a sturdy wooden haft, its grip wrapped in worn leather for a secure hold. Designed to crush armor and bone alike, it is typically used by clerics and heavy infantry who favor blunt, bone-shattering blows over cutting edges.	A flanged steel mace head on a sturdy, leather-gripped wooden haft, designed to crush armor and bone with blunt blows.
63. Misericorde Weapons	This misericorde is a long narrow stiletto-like blade designed to pierce the gaps in plate armor and deliver a precise killing thrust to a downed or immobilized opponent. Its needle-thin profile and stiff spine make it useless as a throwing weapon but devastatingly effective at close range where armor offers little protection.	A long, stiff stiletto-like blade for precise thrusts through plate armor gaps against downed or immobilized foes. Its needle-thin profile makes it unsuitable for throwing.
64. Morning Star Weapons	This morning star is a stout wooden haft topped with a heavy iron sphere bristling with sharp spikes, built to deliver crushing, armor-piercing blows. It is typically used by warriors and temple knights who favor blunt weapons, swinging it in powerful arcs to smash shields and batter foes into submission.	A stout wooden haft topped with a spiked iron sphere, swung in powerful arcs to crush armor, smash shields, and batter foes.

Item	Current description	Proposed shorter description
65. Pole Arm Weapons	This pole arm combines a spear point, an axe-like blade, and a back hook mounted on a long wooden shaft with a leather-wrapped grip. It is typically used by infantry to keep foes at reach, pierce armor, hook riders from the saddle, or strike over the front ranks in formation.	A long-shafted weapon combining a spear point, axe blade, and back hook, used to pierce armor, hook riders, and strike foes at reach or over ranks.
66. Shortbow Weapons	This short bow is a compact, lightly recurved wooden bow with a leather-wrapped grip and a taut bowstring suited for quick shots. It is typically used by scouts, hunters, and light skirmishers who value mobility and close-to-mid range accuracy over extreme distance.	A compact, lightly recurved wooden bow with leather grip and taut string, suited to mobile scouts and hunters making close-to-mid-range shots.
67. Shortsword Weapons	This short sword features a straight, double-edged steel blade with a simple crossguard and a leather-wrapped grip capped by a rounded pommel. Compact and versatile, it is typically used as a primary weapon by lightly armored fighters or as a reliable sidearm and backup blade for knights and adventurers.	A compact, double-edged steel sword with simple guard, leather grip, and rounded pommel, useful as a primary weapon or reliable sidearm.
68. Sickle Weapons	This sickle has a crescent-shaped steel blade fixed to a short wooden haft, its grip bound in worn leather for a firmer hold. Originally a farming tool for cutting grain and brush, it is also used in battle by druids, cultists, and opportunistic fighters who favor quick, hooking slashes at close range.	A crescent steel blade on a short, leather-bound wooden haft, once a farming tool and now a close-range weapon for quick, hooking slashes.
69. Sling Weapons	This sling consists of a leather pouch attached to two braided cords, often with a smooth stone or lead bullet nestled in the cradle. It is typically whirled overhead or to the side and then released at just the right moment, hurling its projectile at surprising speed and range for such a simple weapon.	A leather pouch on two braided cords, used to whirl and release stones or lead bullets at surprising speed and range.
70. Sling, Staff Weapons	A sling staff is a wooden pole fitted with a sling at one end, allowing the user to hurl stones or similar projectiles with far greater force than a hand sling. It is typically used for long-range attacks or hunting, leveraging the staff's length to generate powerful, whip-like acceleration.	A wooden pole fitted with a sling, hurling stones or similar projectiles farther and harder than a hand sling for long-range attacks or hunting.

Item	Current description	Proposed shorter description
71. Staff Weapons	A quarterstaff is a long, sturdy wooden staff, often reinforced at the ends, used both as a walking aid and as a weapon. It is typically wielded with two hands to deliver swift jabs, sweeping strikes, and defensive parries, favored by monks, peasants, and wanderers who travel light.	A long, sturdy quarterstaff, sometimes reinforced at the ends, used as a walking aid, two-handed weapon, or spell focus held or displayed while casting.
72. Warhammer Weapons	This war hammer features a heavy steel head with a flat striking face on one side and a tapered beak on the other, mounted on a stout wooden haft wrapped in leather. It is typically used by warriors and clerics to smash armor, shatter shields, and deliver crushing blows that bypass conventional defenses.	A heavy steel hammer with a flat striking face and tapered beak on a leather-wrapped haft, made to smash armor, shatter shields, and crush defenses.
73. Zweihander Weapons	This zweihander is a massive two-handed sword with a long, straight double-edged blade, parrying hooks above the crossguard, and a leather-wrapped grip ending in a heavy pommel. It is typically wielded by elite infantry to break pike formations, sweep aside enemy weapons, and deliver devastating cleaving blows on the battlefield.	A massive two-handed sword with a long double-edged blade, parrying hooks, leather grip, and heavy pommel, built to break pike formations and sweep aside weapons.
